## 60 SERIES CHANNEL BALANCES

### General Information

- Sash weights indicated below are weights that 2 balances per sash will carry with no weather-strip friction considered.
- Balances stamped with a 3-digit number (e.g. 122, 183, 143) or a 2-digit number (e.g. 15, 18, 19) will require you to contact your account manager for more information; such as exact channel length, type of ends attached, etc.
- Any other number/letter variations should also be reviewed with your account manager to ensure your order will be filled correctly.
- If your existing balance has a "BSI" stamped on the face of the balance by the 4 digit number, order exactly as seen on this chart.
- If your existing balance does not have BSI stamped on it and your balance's 4 digit number has a 40 suffix (e.g. 2840, 2940, 3040, 3640 etc.), you have the old style balance and for 29" balances and above -order 2850, 2950, 3050, 3650, etc. If you are unsure, weigh your sash and choose from the weight charts indicated below.
- For sash weights over those indicated on chart below, please provide the following information:
  - Number stamped on balance \_\_\_\_\_
  - Balance length (do not include ends \_\_\_\_\_
  - Sash weight \_\_\_\_\_
  - Upper or lower sash \_\_\_\_\_
  - e) 2 or 4 balances per sash \_\_\_\_\_

**Note:** Special weight balances were usually stamped with a 4 digit number followed by a two digit number to designate specific weight (e.g. 2640 42 or 2690 42 indicates (2) 27" balances carrying 42 lb. sash.

### Ordering Information

- Measure metal channel balance length. (Do not include plastic ends.)
  - Check number stamped on channel. (e.g. 2010, 28A, 3620 etc.)
  - Select our corresponding part number from the chart below.
  - To identify the top and bottom ends to be attached, refer to pages 14-24.
- Note:** Top and bottom balance ends must be ordered separately. If you want ends attached, add the letter "A" to the suffix of the part number when ordering. If you find the ends you need and they are located with the popular combinations, look for the suffix number and just add that suffix number to the end of the balance part number you selected (e.g. balance 60-242 with ends 60-507 and 60-501 add the suffix -1 so the final part number is 60-242-1).

### Please Note (Important New Information)

Due to increased demand for larger and heavier windows, manufacturers have increased the weight capacity of balances as indicated by our expanded chart. Previously, balances beyond the traditional weight ranges were made for a specific length, weight and often required limited travel and needed to specify upper and lower sash. The examples below show the versatility of the new weight ranges and allow us to inventory these balances to cover a broader range of windows

**Examples:** Old Number 60-26S42L (27" 42lb - Lower Sash)      New Number 60-2680 (27" 42-45lb)  
 60-26S42U (27" 42lb - Upper Sash)  
 60-26S44L (27" 44lb. - Lower Sash)  
 60-26S44U (27" 44lb. - Upper Sash)

All balances listed in this chart no longer need to designate upper or lower and they all have full travel. Balances with weights and lengths above those listed on the chart will require sash weight and upper or lower designation and will have limited travel

**Example:** 27" Channel balance for 49lb. sash  
 60-26S49 (for lower sash)  
 60-26S49U (for upper sash)

For weights above those listed in this chart, see next page.

### WINDOW BALANCE RIVET TOOLS

For Channel and Tube Balances "A Must for Repair and Assembly of Balance Brackets" (Tube & Channel)  
Professional Results! Say Good-bye to Hammered Fingers! FAST - EFFICIENT - COST EFFECTIVE

#### RIVET CRIMPING PLIERS

#### RIVET REMOVAL PLIERS

**59-81**  
Rivet Installation Tool

**59-1**  
Adjusts to accommodate both tube and channel balances.

**59-2**

**59-3**

For tube balances, simply line up pin with peened rivet and squeeze. Rivet will be pushed out. For channel balances, grind or file rivet flush and then squeeze to remove rivet.

Replacement pin for rivet removal pliers
