

74 SERIES BALANCES

Ordering Information

- 1) Measure metal tube length (Do not include nylon bearing).
- 2) Measure spiral rod length. (Make sure rod is flush with screw hole end of tube before measuring.)
- 3) Identify the color of the bearing (e.g., white, red or blue) and select our corresponding part number from the chart below.
- 4) To identify the appropriate carrier or shoe to be attached and other related accessories, see page 64.

Note: Attached carriers and related accessories must be ordered separately. If you want the ends attached, add the letter "A" to the suffix of the part number when ordering.

General Information

- 1) White, red and blue bearings are for sashes weighing up to 22 lbs; green bearings are for sashes weighing up to 26 lbs. Consult your sales representative for ordering information.
- 2) The appropriate tensioning tools are 70-515 and 70-516 as shown on pages 60 and 96.

This series always comes with a shoe or bracket attached. Some customers confuse this series with our 83 series tilt balances on page 73.
